JOURNAL OF VIROLOGY

Volume 15

Contents for March

Animal Viruses

Proteins in Intracellular Simian Virus 40 Nucleoprotein Complexes: Comparison with Simian Virus 40 Core Proteins. William Meinke,* Mark R. Hall, and David A. Goldstein .................................................. 439

RNA of Simian Sarcoma-Associated Virus Type 1 Produced in Human Tumor Cells. H. M. Fidanián, W. N. Drohan, and M. A. Baluda* ........................................... 449

Complementary Strands of CELO Virus DNA. A. J. Robinson* and A. J. D. Bellett .................................................. 458

Method for Determination of Nucleotide Sequence Homology Between Viral Genomes by DNA Ressossoassocation Kinetics. Kei Fujinaga,* Kenji Sekikawa, and Hiroko Yamazaki ................................................................. 466

Stimulation of Non-Histine Chromosomal Protein Synthesis in Simian Virus 40-Infected Simian Cells. Hidemi Ida and Kinichiro Oda* .................................................. 471

Quantitative Assay for Transformation of 3T3 Cells by Herpes Simplex Virus Type 2. Ronald Duff and Fred Rapp* .................................................. 490

Effect of Fatty Acids on Growth of Japanese Encephalitis Virus Cultivated in BHK-21 Cells and Phospholipid Metabolism of the Infected Cells. Shigeru Makino and Howard M. Jenkin* .................................................. 515

Binding Properties of Avian Myeloblastosis Virus DNA Polymerases to Nucleic Acid Affinity Columns. Duane P. Grandgenettt* and Hyune M. Rho .................................................. 526

Induction of Human Cell DNA Synthesis by Herpes Simplex Virus Type 2. Phyllis Melvin and Louis S. Kucera* .................................................. 534

Interspersed by Sequences in Avian Myeloblastosis Virus RNA That Rapidly Hydrizide with Leukemic Chicken Cell DNA. W. N. Drohan, M. ShooYab, R. Wall, and M. A. Baluda* .................................................. 550

DNA of Epstein-Barr Virus. I. Comparative Studies of the DNA of Epstein-Barr Virus from HR-1 and B95-8 Cells: Size, Structure, and Relatedness. R. F. Pritchett, S. D. Hayward, and E. D. Kieff* .................................................. 556

Electron Microscopy of Simian Virus 40 DNA Configuration Under Denatured Conditions. Frank Mayer,* Anthony J. Mazaitis, and Alfred Puhler .................................................. 585

Simian Virus 40 Functions Required for the Establishment and Maintenance of Malignant Transformation. Robert G. Martin* and Janice Yang Chou .................................................. 599

Function of Simian Virus 40 Gene A in Transforming Infection. Peter Tegmentey .................................................. 613

Role of Simian Virus 40 Gene A Function in Maintenance of Transformation. Joan S. Brugge and Janet S. Butel* .................................................. 619

Simian Virus 40 Gene A Function and Maintenance of Transformation. Mary Osborn* and Klaus Weber .................................................. 636

Formation of Nucleoprotein Complexes Between Polyoma Empty Capsids and DNA. H. Vasken Aposhan,* Ronald E. Thayer, and Pradham K. Qasba .................................................. 645

Continued on next page
Elution and Uncoating of Coxsackievirus B3 by Isolated HeLa Cell Plasma Membranes. TIMOTHY G. ROESING, PAUL A. TOSELLI, AND RICHARD L. CROWELL* .... 654

Detection of a Virus-Specific Antigen on the Surface of Herpes Simplex Virus-Transformed Cells. CATHY L. REED, GARY H. COHEN, AND FRED RAPP* ........... 668

Agglutination of Japanese Encephalitis Virus with Concanavalin A. YOSHIYUKI YOSHINAKA* AND TOSHIRO SHIOMI ........................................... 671

Complementation of Human Adenovirus Type 5 ts Mutants by Human Adenovirus Type 12. JIM WILLIAMS,* HAMISH YOUNG, AND PAUL AUSTIN .................... 675

**Bacterial Viruses**

Biological Activity of T4 DNA Synthesized in Toluene-Treated Escherichia coli Cells. LORÉ ANNE McNICOL* AND ROBERT C. MILLER, JR. ................. 479

In Vitro System for the Study of Bacteriophage φX174 Adsorption and Eclipse. PAUL D. NEUWALD ................................................................. 497

Template Activity of Complexes Formed Between Bacteriophage φ2 RNA and Coat Protein. LUDWIA ZAGÓRSKA, JADWIGA CHROBOCZEK, AND WŁODZIMIERZ ZAGÓRSKI* 509

Identification and Characterization of the In Vitro Synthesized Gene Products of Bacteriophage M13. RUUD N. H. KONINGS,* THEO HULSEBOS, AND Cees A. van den HONDEL ................................................................. 570

* Asterisk refers to person to whom inquiries regarding the paper should be addressed.
