Volume 68

June 1994

No. 6

ANIMAL VIRUSES

Protection against Lethal Lymphocytic Choriomeningitis Virus (LCMV) Infection by Immunization of Mice with an Influenza Virus Containing an LCMV Epitope Recognized by Cytotoxic T Lymphocytes	Maria R. Castrucci, Sam Hou, Peter C. Doherty, and Yoshihiro Kawaoka	3486-3490
Hepadnavirus Reverse Transcription Initiates within the Stem-Loop of the RNA Packaging Signal and Employs a Novel Strand Transfer	John E. Tavis, Silvia Perri, and Don Ganem	3536-3543
Identification of Functional Regions in the Human T-Cell Leukemia Virus Type I SU Glycoprotein	Lélia Delamarre, Claudine Pique, Danièle Pham, Thomas Tursz, and Marie-Christine Dokh��lar	3544-3549
Construction of Rubella Virus Genome-Length cDNA Clones and Synthesis of Infectious RNA Transcripts	Chin-Yen Wang, Geraldina Dominguez, and Teryl K. Frey	3550-3557
In Vitro Activities of Purified Visna Virus Integrase	Michael Katzman and Malgorzata Sudol	3558-3569
Transcriptional Mapping of the Varicella-Zoster Virus Regulatory Genes Encoding Open Reading Frames 4 and 63	Paul R. Kinchington, Jean-Paul Vergnes, Patricia Defechereux, Jacques Piette, and Stephanie E. Turse	3570-3581
Identification of an Immediate-Early Gene in the Marek's Disease Virus Long Internal Repeat Region Which Encodes a Unique 14-Kilodalton Polypeptide	Yu Hong and Paul M. Coussens	3593-3603
Mapping and Characterization of Antigenic Epitopes and the Nucleic Acid-Binding Domains of the VP6 Protein of Bluetongue Viruses	Emiko Hayama and Joseph K.-K. Li	3604-3611
Biosynthesis and Biochemical Properties of the Hepatitis C Virus Core Protein	Elisa Santolini, Giovanni Migliaccio, and Nicola La Monica	3631-3641
The Vaccinia Virus A18R Protein Plays a Role in Viral Transcription during both the Early and the Late Phases of Infection	David A. Simpson and Richard C. Condit	3642-3649
Subgenomic RNA Synthesis Directed by a Synthetic Defective Interfering RNA of Mouse Hepatitis Virus: a Study of Coronavirus Transcription Initiation	Robbert G. van der Most, Raoul J. de Groot, and Willy J. M. Spaan	3656-3666
Cloning and Expression of an Equine Herpesvirus 1 Origin-Binding Protein	David W. Martin and Sumitra Deb	3674-3681
Helicase-Primase Complex of Herpes Simplex Virus Type 1: a Mutation in the UL52 Subunit Abolishes Primase Activity	Donna K. Klinedinst and M. D. Challberg	3693-3701
The Protease of Herpes Simplex Virus Type 1 Is Essential for Functional Capsid Formation and Viral Growth	Min Gao, Linda Matusick-Kumar, Warren Hurlburt, Sandra Feuer DiTusa, William W. Newcomb, Jay C. Brown, Patrick J. McCann III, Ingrid Deckman, and Richard J. Colonna	3702-3712
Herpes Simplex Virus Type 1 Recombination: the U_L-DR1 Region Is Required for High-Level α-Sequence-Mediated Recombination	Rebecca Ellis Dutch, Boris V. Zemelman, and I. R. Lehman	3733-3741
Proteolytic Activity of Human Cytomegalovirus UL80 Protease Cleavage Site Mutants	Thomas R. Jones, Lei Sun, Geraldine A. Bebernitz, Viera P. Muzithras, Hong-Jin Kim, Stuart H. Johnston, and Ellen Z. Baum	3742-3752

Continued on following page

Continued from preceding page

Both NS3 and NS4A Are Required for Proteolytic Processing of Hepatitis C Virus Nonstructural Proteins	Cristina Failla, Licia Tomei, and Raffaele De Francesco	3753–3760
Origins of Enhancer Sequences of Recombinant Murine Leukemia Viruses from Spontaneous B- and T-Cell Lymphomas of CWD Mice	Ann C. Massey, Susan C. Lawrenz-Smith, Donald J. Innes, and Christopher Y. Thomas	3773–3783
Mutational Analysis of <i>cis</i>-Acting Packaging Signals in Human Immunodeficiency Virus Type 1 RNA	Jeremy Luban and Stephen P. Goff	3784–3793
NS2B-3 Proteinase-Mediated Processing in the Yellow Fever Virus Structural Region: In Vitro and In Vivo Studies	Sean M. Amberg, Ann Nestorowicz, David W. McCourt, and Charles M. Rice	3794–3802
Genetic Analysis Indicates that the Human Foamy Virus Bel-1 Protein Contains a Transcription Activation Domain of the Acidic Class	Wade S. Blair, Hal Bogerd, and Bryan R. Cullen	3803–3808
Localization of a 34-Amino-Acid Segment Implicated in Dimerization of the Herpes Simplex Virus Type 1 ICP4 Polypeptide by a Dimerization Trap	Paola Gallinari, Karin Wiebauer, Maria Chiara Nardi, and Josef Jiricny	3809–3820
Products of the Porcine Group C Rotavirus NSP3 Gene Bind Specifically to Double-Stranded RNA and Inhibit Activation of the Interferon-Induced Protein Kinase PKR	Jeffrey O. Langland, Sherrie Pettiford, Baoming Jiang, and Bertram L. Jacobs	3821–3829
Comparison of 5' and 3' Long Terminal Repeat Promoter Function in Human Immunodeficiency Virus	Bep Klaver and Ben Berkhout	3830–3840
Expression of the Varicella-Zoster Virus Origin-Binding Protein and Analysis of Its Site-Specific DNA-Binding Properties	Dan Chen and Paul D. Olivo	3841–3849
Cellular Protein Modulates Effects of Human Immunodeficiency Virus Type 1 Rev	Ying Luo, Haifeng Yu, and B. Matija Peterlin	3850–3856
Identification and Characterization of a Novel Structural Glycoprotein in Pseudorabies Virus, gL	Barbara G. Klupp, Judith Baumeister, Axel Karger, Nico Visser, and Thomas C. Mettenleiter	3868–3878
Analysis in Human Immunodeficiency Virus Type 1 Vectors of <i>cis</i>-Acting Sequences That Affect Gene Transfer into Human Lymphocytes	Cristina Parolin, Tatyana Dorfman, Giorgio Palú, Heinrich Göttlinger, and Joseph Sodroski	3888–3895
Substrate Features Important for Recognition and Catalysis by Human Immunodeficiency Virus Type 1 Integrase Identified by Using Novel DNA Substrates	Samson A. Chow and Patrick O. Brown	3896–3907
Attenuated Poliovirus Strain as a Live Vector: Expression of Regions of Rotavirus Outer Capsid Protein VP7 by Using Recombinant Sabin 3 Viruses	Nora M. Mattion, Patricia A. Reilly, Susan J. DiMichele, Joan C. Crowley, and Carolyn Weeks-Levy	3925–3933
UL69 of Human Cytomegalovirus, an Open Reading Frame with Homology to ICP27 of Herpes Simplex Virus, Encodes a Transactivator of Gene Expression	Michael Winkler, Stephen A. Rice, and Thomas Stamminger	3943–3954
Localization of Rotavirus VP4 Neutralization Epitopes Involved in Antibody-Induced Conformational Changes of Virus Structure	Yong-Jie Zhou, John W. Burns, Yasuyuki Morita, Tomoyuki Tanaka, and Mary K. Estes	3955–3964
Central Nervous System-Derived Cells Express a κB-Binding Activity That Enhances Human Immunodeficiency Virus Type 1 Transcription In Vitro and Facilitates TAR-Independent Transactivation by Tat	J. Paul Taylor, Roger J. Pomerantz, Ganesh V. Raj, Fatah Kashanchi, John N. Brady, Shohreh Amini, and Kamel Khalili	3971–3981
Interactions among the Major and Minor Coat Proteins of Polyomavirus	Dan H. Barouch and Stephen C. Harrison	3982–3989
Deletion Mapping of the Rotavirus Metalloprotein NS53 (NSP1): the Conserved Cysteine-Rich Region Is Essential for Virus-Specific RNA Binding	Jian Hua, Xia Chen, and John T. Patton	3990–4000

Continued on following page

Continued from preceding page

The Middle Hepatitis B Virus Envelope Protein Is Not Necessary for Infectivity of Hepatitis Delta Virus	Camille Sureau, Bernadette Guerra, and Helen Lee	4063-4066
Retention of Plasmid DNA in Mammalian Cells Is Enhanced by Binding of the Epstein-Barr Virus Replication Protein EBNA1	Tim Middleton and Bill Sugden	4067-4071
A Furin-Defective Cell Line Is Able To Process Correctly the gp160 of Human Immunodeficiency Virus Type 1	Yukano Ohnishi, Tatsuo Shioda, Kazuhisa Nakayama, Shoichi Iwata, Bin Gotoh, Michinari Hamaguchi, and Yoshiyuki Nagai	4075-4079
The Influenza Virus Panhandle Is Involved in the Initiation of Transcription	Ervin Fodor, David C. Pritlove, and George G. Brownlee	4092-4096
Copackaging of Different-Sized Retroviral Genomic RNAs: Little Effect on Retroviral Replication or Recombination	Jeffery S. Jones, Robert W. Allan, Bradley Seufzer, and Howard M. Temin	4097-4103

VIRUS-CELL INTERACTIONS

VCAM-1 Is a Receptor for Encephalomyocarditis Virus on Murine Vascular Endothelial Cells	Sally A. Huber	3453-3458
The Apoptotic Suppressor P35 Is Required Early during Baculovirus Replication and Is Targeted to the Cytosol of Infected Cells	Pamela A. Hershberger, Douglas J. LaCount, and Paul D. Friesen	3467-3477
Epstein-Barr Virus Nuclear Antigen EBNA3C/6 Expression Maintains the Level of Latent Membrane Protein 1 in G₁-Arrested Cells	M. J. Allday and P. J. Farrell	3491-3498
Preexisting Nuclear Architecture Defines the Intranuclear Location of Herpesvirus DNA Replication Structures	Anne de Bruyn Kops and David M. Knipe	3512-3526
Transcriptional Silencer of the Human Papillomavirus Type 8 Late Promoter Interacts Alternatively with the Viral <i>trans</i>-Activator E2 with a Cellular Factor	Michael May, Karin Grassmann, Herbert Pfister, and Pawel G. Fuchs	3612-3619
The "V3" Domain Is a Determinant of Simian Immunodeficiency Virus Cell Tropism	Frank Kirchhoff, Kazuyasu Mori, and Ronald C. Desrosiers	3682-3692
Uncoating of Human Rhinovirus Serotype 2 from Late Endosomes	Elisabeth Prchla, Ernst Kuechler, Dieter Blaas, and Renate Fuchs	3713-3723
Dissociation of Retinoblastoma Gene Protein Hyperphosphorylation and Commitment To Enter S Phase	Vasily V. Ogryzko, Tazuko H. Hirai, Christopher E. Shih, and Bruce H. Howard	3724-3732
Poliovirus Neutralization by Antibodies to Internal Epitopes of VP4 and VP1 Results from Reversible Exposure of These Sequences at Physiological Temperature	Qihan Li, Alicia Gomez Yafal, Young Mie-Ha Lee, James Hogle, and Marie Chow	3965-3970
Rotavirus Interaction with Isolated Membrane Vesicles	Marie-Christine Ruiz, Sara R. Alonso-Torre, Annie Charpillienne, Monique Vasseur, Fabián Michelangeli, Jean Cohen, and Francisco Alvarado	4009-4016
Glycosylphosphatidylinositol-Anchored CD4 Supports Human Immunodeficiency Virus Type 1 Replication, but Not Cytopathic Effect, in T-Cell Transfectants	William L. Marshall, E. Stuart Mittler, Paul Avery, John P. Lawrence, and Robert W. Finberg	4039-4042
Infection and Inhibition of Human Cytotoxic T Lymphocytes by Herpes Simplex Virus	Christine M. Posavad, Jennifer J. Newton, and Kenneth L. Rosenthal	4072-4074
Cell-Binding Domain of Adenovirus Serotype 2 Fiber	Nathalie Louis, Pascal Fender, Annie Barge, Paul Kitts, and Jadwiga Chroboczek	4104-4106

VIRAL AND CELLULAR ONCOGENES

- | | | |
|--|--|-----------|
| Analysis of AP-1 Function in Cellular Transformation Pathways | Takehisa Suzuki, Masao Murakami, Nobuyuki Onai, Eiko Fukuda, Yoshiko Hashimoto, Martha H. Sonobe, Takashi Kameda, Masao Ichinose, Kazumasa Miki, and Hideo Iba | 3527-3535 |
| Specific Interaction between the Bovine Papillomavirus E5 Transforming Protein and the β Receptor for Platelet-Derived Growth Factor in Stably Transformed and Acutely Transfected Cells | Lisa Petti and Daniel DiMaio | 3582-3592 |
| Adenovirus Type 9 E4 Open Reading Frame 1 Encodes a Transforming Protein Required for the Production of Mammary Tumors in Rats | Ronald T. Javier | 3917-3924 |
| Induction of Tetraploid DNA Content by Simian Virus 40 Is Dependent on T-Antigen Function in the G₂ Phase of the Cell Cycle | Thomas D. Friedrich, Judith Laffin, and John M. Lehman | 4028-4030 |
| A Friend Virus Mutant Encodes a Small Glycoprotein That Causes Erythroleukemia | Maureen E. Hoatlin, Frank E. Ferro, Jr., Susan L. Kozak, and David Kabat | 4053-4056 |

PROTOZOAN AND FUNGAL VIRUSES

- | | | |
|---|---------------------------------|-----------|
| <i>Trichomonas vaginalis</i> with a Double-Stranded RNA Virus Has Upregulated Levels of Phenotypically Variable Immunogen mRNA | Ali Khoshnan and J. F. Alderete | 4035-4038 |
|---|---------------------------------|-----------|

VIRAL PATHOGENESIS AND IMMUNITY

- | | | |
|---|--|-----------|
| Alteration of V3 Loop Context within the Envelope of Human Immunodeficiency Virus Type 1 Enhances Neutralization | Marjorie Robert-Guroff, Audrey Louie, Maria Myagkikh, Frank Michaels, Marie Paule Kieny, Mary E. White-Scharf, Barbara Potts, Daniel Grogg, and Marvin S. Reitz, Jr. | 3459-3466 |
| Requirement of Human Immunodeficiency Virus Type 1 <i>nef</i> for In Vivo Replication and Pathogenicity | Beth D. Jamieson, Grace M. Aldrovandi, Vicente Planelles, Jeremy B. M. Jowett, Lianying Gao, Lillian M. Bloch, Irvin S. Y. Chen, and Jerome A. Zack | 3478-3485 |
| Subtype Cross-Reactive, Infection-Enhancing Antibody Responses to Influenza A Viruses | Manabu Tamura, Robert G. Webster, and Francis A. Ennis | 3499-3504 |
| Primary Pulmonary Cytotoxic T Lymphocytes Induced by Immunization with a Vaccinia Virus Recombinant Expressing Influenza A Virus Nucleoprotein Peptide Do Not Protect Mice against Challenge | Cassandra M. Lawson, Jack R. Bennink, Nicholas P. Restifo, Jonathan W. Yewdell, and Brian R. Murphy | 3505-3511 |
| Changes in RNA Expression Pattern during the Malignant Progression of Cottontail Rabbit Papillomavirus-Induced Tumors in Rabbits | R. Zeltner, L. A. Borenstein, F. O. Wettstein, and T. Iftner | 3620-3630 |
| Vesicular Stomatitis Virus Indiana Glycoprotein as a T-Cell-Dependent and -Independent Antigen | Giulia Freer, Christoph Burkhardt, Ilja Ciernik, Martin F. Bachmann, Hans Hengartner, and Rolf M. Zinkernagel | 3650-3655 |
| Apoptosis: a Mechanism of Cell Killing by Influenza A and B Viruses | Virginia S. Hinshaw, Christopher W. Olsen, Naomi Dybdahl-Sissoko, and David Evans | 3667-3673 |

Neuron-Specific Restriction of a Herpes Simplex Virus Recombinant Maps to the UL5 Gene

A Nonstructural *gag*-Encoded Glycoprotein Precursor Is Necessary for Efficient Spreading and Pathogenesis of Murine Leukemia Viruses

Identification of a Sequence in the Unique 5' Open Reading Frame of the Gene Encoding Glycosylated Gag Which Influences the Incubation Period of Neurodegenerative Disease Induced by a Murine Retrovirus

Antibodies of Symptomatic Human Immunodeficiency Virus Type 1-Infected Individuals Are Directed to the V3 Domain of Noninfectious and Not of Infectious Virions Present in Autologous Serum

Antigenic Structure of Envelope Glycoprotein E1 of Hog Cholera Virus

Synergistic Neutralization of Human Immunodeficiency Virus Type 1 by Combinations of Human Monoclonal Antibodies

Human Cytomegalovirus Infection of the Monocyte/Macrophage Lineage in Bone Marrow

Sendai Virus Pneumonia: Evidence for the Early Recruitment of $\gamma\delta$ T Cells during the Disease Course

Cross-Neutralizing Activity against Divergent Human Immunodeficiency Virus Type 1 Isolates Induced by the gp41 Sequence ELDKWAS

T-Cell Response to Cottontail Rabbit Papillomavirus Structural Proteins in Infected Rabbits

FVB Mice Transgenic for the *H-2D^b* Gene Become Resistant to Persistent Infection by Theiler's Virus

Constitutive Production of Alpha and Beta Interferons in Mutant Human Cell Lines

Persistence of Simian Immunodeficiency Virus Mne Variants upon Transmission

Expression and Characterization of Virus-Like Particles Containing Rubella Virus Structural Proteins

David C. Bloom and Jack G. Stevens 3761-3772

Antoine Corbin, Anne Catherine Prats, Jean-Luc Darlix, and Marc Sitbon 3857-3867

John L. Portis, Gerald J. Spangrude, and Frank J. McAtee 3879-3887

Michael Schreiber, Heiko Petersen, Christoph Wachsmuth, Harm Müller, Frank T. Hufert, and Herbert Schmitz 3908-3916

P. A. van Rijn, G. K. W. Miedema, G. Wensvoort, H. G. P. van Gennip, and R. J. M. Moormann 3934-3942

Suman Laal, Sherri Burda, Mirosław K. Gorny, Sylwia Karwowska, Aby Buchbinder, and Susan Zolla-Pazner 4001-4008

E. J. Minton, C. Tysoe, J. H. Sinclair, and J. G. P. Sissons 4017-4021

Tomohiko Ogasawara, Masashi Emoto, Katsuhiko Kiyotani, Kaoru Shimokata, Tetsuya Yoshida, Yoshiyuki Nagai, and Yasunobu Yoshikai 4022-4027

Thomas Muster, Rosario Guinea, Alexandra Trkola, Martin Purtscher, Annelies Klima, Franz Steindl, Peter Palese, and Hermann Katinger 4031-4034

Ramaiah Selvakumar, Lee A. Borenstein, Yi-Ling Lin, Rafi Ahmed, and Felix O. Wettstein 4043-4048

Ariele Azoulay, Michel Brahic, and Jean-François Bureau 4049-4052

Roslyn McKendry, Sandra Pellegrini, Ian M. Kerr, and George R. Stark 4057-4062

Bryce Chackerian, William R. Morton, and Julie Overbaugh 4080-4085

Zhiyong Qiu, Dawei Ou, He Wu, Tom C. Hobman, and Shirley Gillam 4086-4091

ERRATUM

Binding of the Protease-Sensitive Form of PrP (Prion Protein) to Sulfated Glycosaminoglycan and Congo Red

Byron Caughey, Katherine Brown, Gregory J. Raymond, Gil E. Katzenstein, and Wayne Thresher 4107

AUTHOR'S CORRECTION

Identification and Characterization of a Human Herpesvirus 6 Gene Segment Capable of Transactivating the Human Immunodeficiency Virus Type 1 Long Terminal Repeat in an Sp1 Binding Site-Dependent Manner

Jinhai Wang, Clinton Jones, Michael Norcross, Ernst Bohnlein, and Abdur Razzaque 4108
