Articles of Significant Interest Selected from This Issue by the Editors

GUEST COMMENTARY

Adaptive Value of High Mutation Rates of RNA Viruses: Separating Causes from Consequences

Santiago F. Elena and Rafael Sanjuán

11555–11558

STRUCTURE AND ASSEMBLY

Amino Acid Residues in the Cytoplasmic Domain of the Mason-Pfizer Monkey Virus Glycoprotein Critical for Its Incorporation into Virions

Chisu Song, Keith Micoli, Helena Bauerova, Iva Pichova, and Eric Hunter

11559–11568

Activity of the Mason-Pfizer Monkey Virus Fusion Protein Is Modulated by Single Amino Acids in the Cytoplasmic Tail

Chisu Song, Keith Micoli, and Eric Hunter

11569–11579

Characterization of an Alternate Form of Newcastle Disease Virus Fusion Protein

Homer Pantua, Lori W. McGinnes, John Leszyk, and Trudy G. Morrison

11660–11670

Resuscitating Mutations in a Furin Cleavage-Deficient Mutant of the Flavivirus Tick-Borne Encephalitis Virus

Sigrid Elshuber and Christian W. Mandl

11813–11823

The Carboxyl-Terminal Sequence of the Pestivirus Glycoprotein E′.rev Represents an Unusual Type of Membrane Anchor

Christiane Fetzer, Birke Andrea Tews, and Gregor Meyers

11901–11913

Viron Instability of Human Immunodeficiency Virus Type 1 Reverse Transcriptase (RT) Mutated in the Protease Cleavage Site between RT p51 and the RT RNase H Domain

Nicolas Le May, Nicolas Gauliard, Agné Billecocq, and Michèle Bouloy

11952–11961

Membrane Structures of the Hemifusion-Inducing Fusion Peptide Mutant G1S and the Fusion-Blocking Mutant G1V of Influenza Virus Hemagglutinin Suggest a Mechanism for Pore Opening in Membrane Fusion

Yinling Li, Xing Han, Alex L. Lai, John H. Bushweller, David S. Cafiso, and Lukas K. Tamm

12065–12076

GENOME REPLICATION AND REGULATION OF VIRAL GENE EXPRESSION

Mutagenesis Analysis of the rGTP-Specific Binding Site of Hepatitis C Virus RNA-Dependent RNA Polymerase

Zhaohui Cai, MinKyung Yi, Chen Zhang, and Guangxiang Luo

11607–11617

Deletion of gpUL132, a Structural Component of Human Cytomegalovirus, Results in Impaired Virus Replication in Fibroblasts

Simone Spaderna, Barbara Kropff, Yvonne Ködel, Siyuan Shen, Scott Coley, Shan Lu, William Britt, and Michael Mach

11837–11847

Characterization of the Nuclear Localization and Nuclear Export Signals of Bovine Herpesvirus 1 VP22

Chunfu Zheng, Robert Brownlie, Lorne A. Babiuk, and Sylvia van Drunen Littel-van den Hurk

11864–11872

The Human Herpesvirus 6 G Protein-Coupled Receptor Homolog U51 Positively Regulates Virus Replication and Enhances Cell-Cell Fusion In Vitro

Zhu Zhen, Birgit Bradel-Tretheway, Sarah Sumagin, Jean M. Bidlack, and Stephen Dewhurst

11914–11924

Continued on following page
An Authentic 3' Noncoding Region Is Necessary for Efficient Poliovirus Replication

David M. Brown, Christopher T. Cornell, Genevieve P. Tran, Joseph H. C. Nguyen, and Bert L. Semler 11962–11973

Effects of Substitutions of Arginine Residues on the Basic Surface of Herpes Simplex Virus UL42 Support a Role for DNA Binding in Processive DNA Synthesis

John C. W. Randell, Gloria Komazin, Changying Jiang, Charles B. C. Hwang, and Donald M. Coen 12025–12034

Identification and Characterization of Human Cytomegalovirus-Encoded MicroRNAs

Rift Valley Fever Virus NSs mRNA Is Transcribed from an Incoming Anti-Viral-Sense S RNA Segment

Tetsuro Ikegami, Sungyong Won, C. J. Peters, and Shinho Makino 12106–12111

GENETIC DIVERSITY AND EVOLUTION

In-Depth Analysis of a Heterosexually Acquired Human Immunodeficiency Virus Type 1 Superinfection: Evolution, Temporal Fluctuation, and Intercompartment Dynamics from the Seronegative Window Period through 30 Months Postinfection

Molecular Evolution Analysis and Geographic Investigation of Severe Acute Respiratory Syndrome Coronavirus-Like Virus in Palm Civets at an Animal Market and on Farms

Biao Kan, Ming Wang, Huaqi Jing, Huifang Xu, Xiugao Jiang, Meiyong Yan, Weili Liang, Han Zheng, Kanglin Wan, Qiyong Liu, Buyun Cui, Yanmei Xu, Enmin Zhang, Hongxia Wang, Jingrong Ye, Guichang Li, Machao Li, Zhigang Cui, Xiaobao Qi, Kai Chen, Lin Du, Kai Gao, Yu-teng Zhao, Xiao-zhong Zou, Yue-Ju Feng, Yu-Fan Gao, Rong Hai, Dongzhen Yu, Yi Guan, and Jianguo Xu 11892–11900

Molecular Footprint of Drug-Selective Pressure in a Human Immunodeficiency Virus Transmission Chain

Philippe Lemey, Inge Derdelinckx, Andrew Rambaut, Kristel Van Laethem, Stephanie Dumont, Steve Vermeulen, Eric Van Wijngaarden, and Anne-Mieke Vandamme 11981–11989

VIRUS-CELL INTERACTIONS

Differential Restriction of Human Immunodeficiency Virus Type 2 and Simian Immunodeficiency Virus SIVmac by TRIM5α Alleles

Laura M. J. Ylinen, Zuzana Keckesova, Sam J. Wilson, Srinika Ranasinghe, and Greg J. Towers 11580–11587

Herpes Simplex Virus Glycoprotein B Binds to Cell Surfaces Independently of Heparan Sulfate and Blocks Virus Entry

Florent C. Bender, J. Charles Whitbeck, Huan Lou, Gary H. Cohen, and Roselyn J. Eisenberg 11588–11597

Influence of Fiber Detargeting on Adenovirus-Mediated Innate and Adaptive Immune Activation

John W. Schoggins, Marcelo Nociari, Nicola Philpott, and Erik Falck-Pedersen 11627–11637

Interferon Regulatory Factor 5 Represses Expression of the Epstein-Barr Virus Oncoprotein LMP1: Braking of the IRF7/LMP1 Regulatory Circuit

Shunbin Ning, Leslie E. Huyse, and Joseph S. Pagano 11671–11676

Sialidase Activity of Influenza A Virus in an Endocytic Pathway Enhances Viral Replication

Takashi Suzuki, Tadanobu Takahashi, Chao-Tan Guo, Kazuya I.-P. Jwa Hidari, Daisei Miyamoto, Hideo Goto, Yoshihiro Kawaoka, and Yasuo Suzuki 11705–11715

Continued on following page
Involvement of Cytoskeletal Components in BK Virus Infectious Entry

Sylvia Eash and Walter J. Atwood 11734–11741

Rab9 GTPase Is Required for Replication of Human Immunodeficiency Virus Type 1, Filoviruses, and Measles Virus

James L. Murray, Manos Mavrakis, Natalie J. McDonald, Mamadi Yilla, Jinsong Sheng, William J. Bellini, Lijun Zhao, Joseph M. Le Doux, Michael W. Shaw, Chi-Cheng Luo, Jennifer Lippincott-Schwartz, Anthony Sanchez, Donald H. Rubin, and Thomas W. Hodge 11742–11751

Evidence that Insertion of Tomato Ringspot Nepovirus NTB-VPg Protein in Endoplasmic Reticulum Membranes Is Directed by Two Domains: a C-Terminal Transmembrane Helix and an N-Terminal Amphipathic Helix

Shuo Cheng Zhang, Guangzhi Zhang, Lanying Yang, Joan Chisholm, and Hélène Sanfaçon 11752–11765

Vimentin Rearrangement during African Swine Fever Virus Infection Involves Retrograde Transport along Microtubules and Phosphorylation of Vimentin by Calcium Calmodulin Kinase II

Sandra Stefanovic, Miriam Windsor, Koh-ici Nagata, Masaki Inagaki, and Thomas Wileman 11766–11775

Inhibition of Ubiquitination and Stabilization of Human Ubiquitin E3 Ligase PIRH2 by Measles Virus Phosphoprotein

Mingzhou Chen, Jean-Claude Cortay, Ian R. Logan, Vasileia Sapountzi, Craig N. Robson, and Denis Gerlier 11824–11836

The Extracellular Domain of Herpes Simplex Virus gE Is Indispensable for Efficient Cell-to-Cell Spread: Evidence for gE/gI Receptors

Katarina Policova, Kim Goldsmith, Barb L. Rainish, Todd W. Wisner, and David C. Johnson 11990–12001

A Splicing Enhancer in the E4 Coding Region of Human Papillomavirus Type 16 Is Required for Early mRNA Splicing and Polyadenylation as Well as Inhibition of Premature Late Gene Expression

Margaret Rush, Xiaomin Zhao, and Stefan Schwartz 12002–12015

Inhibition of Coxsackie B Virus Infection by Soluble Forms of Its Receptors: Binding Affinities, Altered Particle Formation, and Competition with Cellular Receptors

Ian G. Goodfellow, David J. Evans, Anna M. Blom, Dave Kerrigan, J. Scott Miners, B. Paul Morgan, and O. Brad Spiller 12016–12024

Integration Targeting by Avian Sarcoma-Leukosis Virus and Human Immunodeficiency Virus in the Chicken Genome

The 41-Amino-Acid C-Terminal Region of the Hepatitis E Virus ORF3 Protein Interacts with Bikunin, a Kunitz-Type Serine Protease Inhibitor

Shweta Tyagi, Milan Surjit, and Sunil K. Lal 12081–12087

Human Immunodeficiency Virus Type 1 Viral Synapse Formation in T Cells Requires Lipid Raft Integrity

Clare Jolly and Quentin J. Sattentau 12088–12094

CELLULAR RESPONSE TO INFECTION

The Src Family Kinase c-Yes Is Required for Maturation of West Nile Virus Particles

TRANSFORMATION AND ONCOGENESIS

Simian Virus 40 Large T Antigen's Association with the CUL7 SCF Complex Contributes to Cellular Transformation

Continued on following page
Aberrant Activation of the Interleukin-2 Autocrine Loop through the Nuclear Factor of Activated T Cells by Nonleukemogenic Human T-Cell Leukemia Virus Type 2 but Not by Leukemogenic Type 1 Virus

Akiko Niinuma, Masaya Higuchi, Masahiko Takahashi, Masayasu Oie, Yuetsu Tanaka, Fumitake Gejyo, Nobuyuki Tanaka, Kazuo Sugamura, Li Xie, Patrick L. Green, and Masahiro Fujii

GENE DELIVERY

Green Fluorescent Protein-Tagged Adeno-Associated Virus Particles Allow the Study of Cytosolic and Nuclear Trafficking

Kerstin Lux, Nico Goerlitz, Stefanie Schlemminger, Luca Perabo, Daniela Goldnau, Jan Endell, Kristin Leíke, David M. Koffer, Stefan Finke, Michael Hallek, and Hildegard Büning

VACCINES AND ANTIVIRAL AGENTS

Antimicrobial Peptides from Amphibian Skin Potently Inhibit Human Immunodeficiency Virus Infection and Transfer of Virus from Dendritic Cells to T Cells

Scott E. VanCompernolle, R. Jeffery Taylor, Kyra Oswald-Richter, Jiyang Jiang, Bryan E. Youree, John H. Bowie, Michael J. Tyler, J. Michael Conlon, David Wade, Christopher Aiken, Terence S. Dermody, Vineet N. KewalRamani, Louise A. Rollins-Smith, and Derya Unutmaz

Vaccinia Virus H3L Envelope Protein Is a Major Target of Neutralizing Antibodies in Humans and Elicits Protection against Lethal Challenge in Mice

D. Huw Davies, Megan M. McCausland, Conrad Valdez, Devan Huynh, Jenny E. Hernandez, Yunxiang Mu, Siddiqua Hirst, Luis Villarreal, Philip L. Felgner, and Shane Crotty

An Attenuated LC16m8 Smallpox Vaccine: Analysis of Full-Genome Sequence and Induction of Immune Protection

Shigeru Morikawa, Tokuki Sakiyama, Hideki Hasegawa, Masayuki Saijo, Akihiko Maeda, Ichiro Kurane, Go Maeno, Junko Kimura, Chie Hirama, Teruhiko Yoshida, Yasuko Asahi-Ozaki, Tetsutaro Sata, Takeshi Kurata, and Asato Kojima

Human Immunodeficiency Virus Mutagenesis during Antiviral Therapy: Impact of Drug-Resistant Reverse Transcriptase and Nucleoside and Nonnucleoside Reverse Transcriptase Inhibitors on Human Immunodeficiency Virus Type 1 Mutation Frequencies

Renxiang Chen, Masaru Yokoyama, Hironori Sato, Cavan Reilly, and Louis M. Mansky

PATHOGENESIS AND IMMUNITY

Decreased Virus Population Diversity in p53-Null Mice Infected with Weakly Oncogenic Abelson Virus

Erica Marchlik, Richard Kalman, and Naomi Rosenberg

Single Amino Acid Substitutions in the Severe Acute Respiratory Syndrome Coronavirus Spike Glycoprotein Determine Viral Entry and Immunogenicity of a Major Neutralizing Domain

Christopher E. Yi, Lei Ba, Linqi Zhang, David D. Ho, and Zhiwei Chen

Attenuation of Marek’s Disease Virus by Deletion of Open Reading Frame RLORF4 but Not RLORF5a

Keith W. Jarosinski, Nikolaus Osterrieder, Venugopal K. Nair, and Karel A. Schat
Combined Effect of CCR5-A32 Heterozygosity and the CCR5 Promoter Polymorphism −2459 A/G on CCR5 Expression and Resistance to Human Immunodeficiency Virus Type 1 Transmission

Florian Hladik, Huanliang Liu, Emily Speelman, Devor Livingston-Rosanoff, Sean Wilson, Polachai Sakchalathorn, Yon Hwangbo, Benjamin Greene, Tuofu Zhu, and M. Juliana McElrath

11677–11684

Borna Disease Virus Replication in Organotypic Hippocampal Slice Cultures from Rats Results in Selective Damage of Dentate Granule Cells

Daniel Mayer, Heike Fischer, Urs Schneider, Bernd Heimrich, and Martin Schwemmle

11716–11723

Avian Influenza (H5N1) Viruses Isolated from Humans in Asia in 2004 Exhibit Increased Virulence in Mammals

11788–11800

Rabies Virus-Induced Activation of Mitogen-Activated Protein Kinase and NF-κB Signaling Pathways Regulates Expression of CXC and CC Chemokine Ligands in Microglia

Kazuo Nakamichi, Megumi Saiki, Makoto Sawada, Mutsuyo Takayama-Ito, Yutaka Yamamuro, Kinjiro Morimoto, and Ichiro Kurane

11801–11812

Human Immunodeficiency Virus Type 1 Variants Isolated from Single Plasma Samples Display a Wide Spectrum of Neutralization Sensitivity

Katharina Skrabal, Sentob Saragosti, Jean-Louis Labernardie, Francis Barin, François Clavel, and Fabrizio Mammano

11848–11857

Extraneural Prion Neuroinvasion without Lymphoreticular System Infection

Jason C. Bartz, Crista DeJoia, Tammy Tucker, Anthony E. Kincaid, and Richard A. Bessen

11858–11863

In Vivo Kinetics of GITR and GITR Ligand Expression and Their Functional Significance in Regulating Viral Immunopathology

Susmit Suvas, Bumseok Kim, Pranita P. Sarangi, Masahide Tone, Herman Waldmann, and Barry T. Rouse

11935–11942

Molecular Basis of Replication of Duck H5N1 Influenza Viruses in a Mammalian Mouse Model

Zejun Li, Hualan Chen, Peirong Jiao, Guohua Deng, Guobin Tian, Yanbing Li, Erich Hoffmann, Robert G. Webster, Yamiko Matsuoka, and Kangzhen Yu

12058–12064

Complete Deletion of Wheat Streak Mosaic Virus HC-Pro: a Null Mutant Is Viable for Systemic Infection

Drake C. Stenger, Roy French, and Frederick E. Gildow

12077–12080

Unique Acquisition of Cytotoxic T-Lymphocyte Escape Mutants in Infant Human Immunodeficiency Virus Type 1 Infection

12100–12105

Increased Expression of the NK Cell Receptor KLRG1 by Virus-Specific CD8 T Cells during Persistent Antigen Stimulation

Robert Thimme, Victor Appay, Marie Koschella, Elisabeth Panther, Evelyn Roth, Andrew D. Hislop, Alan B. Rickinson, Sarah L. Rowland-Jones, Hubert E. Blum, and Hanspeter Pircher

12112–12116

Continued on following page
Sustained CD8\(^+\) T-Cell Responses Induced after Acute Parvovirus B19 Infection in Humans

Oscar Norbeck, Adiba Isa, Christoph Pöhlmann, Kristina Broliden, Victoria Kasprowicz, Paul Bowness, Paul Klenerman, and Thomas Tolfvenstam

ERRATUM

The Immediate-Early Protein IE0 of the Autographa californica Nucleopolyhedrovirus Is Not Essential for Viral Replication

Liqun Lu, Hadassah Rivkin, and Nor Chejanovsky

Cover photograph (Copyright © 2005, American Society for Microbiology. All Rights Reserved.): Targeting of retroviral DNA integration in the chicken genome. The box behind the rooster shows ideograms of the chicken chromosomes, indicating sites of retroviral integration by avian sarcoma-leukosis virus (red lollipops) and human immunodeficiency virus (blue lollipops). The locations of chicken endogenous retroviral sequences are also indicated (purple shading for endogenous retrovirus group L; green shading for endogenous retrovirus group K). (Cover by Jamie Simon, Stephen Barr, Jeremy Leipzig, and Frederic Bushman.) (See related article on page 12035.)
