**Supplementary Figure 1.** Changes in soluble markers of inflammation and mucosal damage after ABX and FMT treatments. A. Plasma levels of IL-2, IL-15, and VEGF measured by Luminex. B. Plasma levels of sCD14, LPS binding protein, C reactive protein, and soluble IL-6 receptor measured by ELISA. Asterisks indicate significant difference by paired t test (*P<0.005, **P<0.01, ***P<0.001).
