Philipp Gerhardt, *Vice-President* (1973-1974)
T. J. Carski, *Treasurer*

The *Journal of Virology*, a publication of the American Society for Microbiology, 1913 I St., N.W., Washington, D.C. 20006, is devoted to the dissemination of fundamental knowledge concerning viruses of bacteria, plants, and animals. Investigators are invited to submit reports of original research in all areas of basic virology, including biochemistry, biophysics, genetics, immunology, morphology, and physiology. The *Journal* is issued monthly, two volumes per year. The subscription price is \$40 (foreign, \$41) per year; single copies are \$4.00 (foreign, \$4.25). Members of the American Society for Microbiology may receive the *Journal* as part of their dues. Correspondence relating to subscriptions, reprints, defective copies, availability of back issues, lost or late proofs, disposition of submitted manuscripts and general editorial matters should be directed

to the ASM Publications Office, 1913 I St., N.W., Washington, D.C. 20006 (area 202 833-9416). Correspondence from ASM members relating to membership dues, member subscriptions, changes of address, incorrect address, incorrect journals, etc., should be directed to the Executive Secretary, American Society for Microbiology, 1913 I St., N.W., Washington, D.C. 20006. Published monthly by the ASM at 428 E. Preston St., Baltimore, Md. 21202.

Second-class postage paid at Baltimore, Md. 21202, and at additional mailing offices

JOURNAL OF VIROLOGY

INSTRUCTIONS TO AUTHORS

Correspondence. Submit manuscripts in duplicate (original and one carbon) to ASM Publications office, 1913 I St., N.W., Washington, D.C. 20006.

General policy. Any manuscript submitted must be a report of unpublished original research, which is not being considered for publication elsewhere. A manuscript accepted and published by the *Journal* must not be published again in any form without the consent of ASM.

A charge of \$25 per printed page is assessed for publication in the *Journal*. Most institutions and granting agencies in the United States permit the payment of publication charges as part of their general research support. It is recognized, however, that such funds are not always available to laboratories outside the United States. In such cases, the cost of publication will be borne by the American Society for Microbiology. Ability or inability to pay the publication charge is not a factor in the selection of manuscripts for publication.

The "editorial style" of the *Journal* essentially follows the *CBE Style Manual* (3rd ed., AIBS, 1972). Biochemical abbreviations and nomenclature should essentially follow "Biochemical Nomenclature" in *Handbook of Biochemistry*, (2nd ed., 1970, H. A. Sober, ed., The Chemical Rubber Co., Cleveland, p. A4-A24). Normally, abbreviations (except those of standard units of measurement and symbols of the elements) should be defined and introduced parenthetically at first use in the text. Certain abbreviations will be accepted without definition in the title, abstract, and text. Among these abbreviations are: DNA (deoxyribonucleic acid); RNA (ribonucleic acid); rRNA (ribosomal RNA); mRNA (messenger RNA); tRNA (transfer RNA); AMP, ADP, ATP, dAMP, dADP, dATP (for the respective 5' phosphates of adenosine or the other nucleosides, using appropriate letter symbols); 2'-AMP, 3'-AMP, 5'-AMP (the 2', 3', and 5', where needed for contrast, phosphates of the nucleosides); DNase (deoxyribonuclease); RNase (ribonuclease); P_i (orthophosphate); PP_i (pyrophosphate); mol wt (molecular weight); UV (ultraviolet); PFU (plaque-forming units); Tris (tris(hydroxymethyl)aminomethane); DEAE- (diethylaminoethyl-); and EDTA (ethylenediaminetetraacetate). Genetic symbols should essentially follow the recommendations of Demerec et al. (*Genetics* 54:61, 1966). Enzyme activity should be expressed in terms of international units (*Enzyme Nomenclature*, Elsevier Publishing Co., 1965), and the EC number should be given parenthetically at first use in the text. In expressing lengths, weights, and volumes, the prefixes nano (n) and pico (p) should be used instead of millimicro (m μ) and micromicro ($\mu\mu$). Express lengths in nanometers (nm; 10⁻⁹ m) or in micrometers (μ m; 10⁻⁶ m) instead of millimicrons (m μ ; 10⁻⁹ m), microns (μ ; 10⁻⁶ m), or Angstroms (Å; 10⁻¹⁰ m). Express parts per million (ppm) as micrograms per milliliter (μ g/ml), micrograms per gram (μ g/g), or microliters per liter (μ liters/liter), as appropriate. In general, measurements should be expressed in terms of standard international metric units. The *Journal* reserves the privilege of editing manuscripts to make them conform with the adopted style.

Form of manuscript. All parts of the manuscript should be typed double-space or, preferably, triple-space. Most manuscripts can and should be divided into the following sections: Abstract, Introduction, Materials and Methods, Results, Discussion, Acknowledgments, and Literature Cited. Only one weight of heading (paragraph lead-in) should be used within each section.

Abstract. An Abstract appears at the beginning

of each paper in the *Journal*. The abstract should not exceed 250 words.

Literature Cited. In the text, references are cited by number. The Literature Cited section should be typed in alphabetical order, by first author, and numbered. Names of journals are abbreviated according to *Chemical Abstracts Service Source Index* (American Chemical Society, 1970). Literature citations should be restricted to closely pertinent papers. Citations of abstracts, theses, "unpublished data," "personal communication," and "in press" will not be accepted in the Literature Cited, but may be used parenthetically in the text.

Tables. Each table should be typed on a separate page. The data should be arranged so that columns of like material read down, not across. The headings should be sufficiently clear so that the meaning of the data will be understandable without reference to the text. Explanatory footnotes are permitted, but detailed descriptions of the experiments are not. The materials and methods used to gain the data should properly remain in the section of that name.

Figures. A complete set of figures, preferably glossy photographs, should accompany each of the two copies of the manuscript. Each figure should be numbered and should include the name of the author, either in the margin or on the back (marked lightly with a soft pencil). Graphs (*submit as photographs*) should be finished drawings not needing further artwork or type-setting. Absolutely no part of a graph should be typewritten (except the legend, which should be typed on a separate page). All lettering should be done with a lettering set. Most graphs will be reduced to one-column width, and all elements in the drawing should be prepared to withstand this reduction. The legend of the figure should provide enough information so that the figure is understandable without reference to the text. Experimental details from Materials and Methods should not be repeated in figure legends.

Notes. The accepted form for Notes is somewhat different from the foregoing. Contributors should consult a recent issue of the *Journal* for style. Notes should not exceed 500 words. The Abstract should not exceed 25 words. Papers submitted as Notes which are fragments of full-length papers are not acceptable. Consideration will be given to publication of Notes which consist of commentaries or interpretations of principles of virology.

Nomenclature of viruses. Viruses named after a disease should be written as separate words in lower-case roman, except when the name of the disease is derived from a proper noun: herpes simplex virus, measles virus, Newcastle disease virus, poliomyelitis virus, varicella-zoster virus, vaccinia virus.

Most other viruses should be written as a single word in lower case: adenovirus, coxsackievirus, cytomegalovirus, echovirus, herpesvirus, mengovirus, picornavirus, poliovirus, poxvirus.

Copyright. Once a paper has been published in the *Journal*, which is a copyrighted publication, the legal ownership of all parts of the paper, including the illustrations, has passed from the author to the *Journal*. If the same author, or any author, wishes to republish material previously published in the *Journal*, he must first receive written permission from ASM.

Reprints. Reprints (in multiples of 100) will be furnished contributors when ordered in advance. A table showing the cost of reprints, and an order form, will be sent with the proof.

Active Membership—American Society for Microbiology

1913 "Eye" St., N. W., Washington, D. C. 20006

NOMINATION FOR MEMBERSHIP

The Society welcomes to active membership any person who is interested in its objects, and who holds a bachelor's degree in microbiology or a related field (or who has had training and experience equivalent to that represented by a bachelor's degree).

The Society has seven scientific journals: (1) *Journal of Bacteriology* (JB), in which are found original communications on all branches of fundamental microbiology; (2) *Applied Microbiology* (AM), which contains original communications dealing mainly with industrial and applied applications of microbiology; (3) *Journal of Virology* (JVI), which is devoted to articles on fundamental knowledge of viruses of bacteria, plants, and animals; (4) *Infection and Immunity* (IAI), which contains original communications on all aspects of medical microbiology and immunology; (5) *Antimicrobial Agents and Chemotherapy* (AAC), which includes all aspects of antimicrobial agents and chemotherapy, including cancer chemotherapy; (6) *Bacteriological Reviews* (BR), a quarterly review journal containing articles on subjects of current microbiological interest, and (7) *International Journal of Systematic Bacteriology* (IJSB), a quarterly journal devoted to bacterial nomenclature, published for the IAMS. In addition, the Society publishes the monthly ASM NEWS, which is sent to all members and contains news and announcements of concern to all microbiologists.

The Society holds an Annual Meeting where the latest results of research in all branches of microbiology are presented, and where members have opportunities to become acquainted and to discuss work in progress. The abstracts of papers presented at the meetings are published.

The annual Interscience Conference on Antimicrobial Agents and Chemotherapy provides opportunity for an exchange of information among all scientific disciplines interested in chemotherapeutic agents and infectious disease.

The minimum annual membership fee is \$20 which includes \$5 dues, \$2 for subscription to *ASM News*, and \$13 for a year's subscription to any one of the Society's journals listed in No. 1 below. You must fill in No. 1. For additional journals, fill in No. 2.

Memberships are initiated and renewed as of January 1 each year. Unless there are directions to the contrary, membership nominations received prior to November 1 will be credited to the current year, and back issues of the selected publications for the current year will be furnished. Nominations received after November 1 will become effective on the following January 1.

FIRST NAME Initial LAST NAME

Nominated by (1)

(Signatures of Society members) (2)

1. First Journal (\$13), *ASM News* (\$2), and dues (\$5). Circle one journal choice:

JB	AAC	AM	JVI	BR	IAI	
				08	<i>ASM News</i>	\$2
				10	Dues	\$5
					Journal	\$13

If you want only one journal remit total of..... \$20

2. Additional Journals may be purchased as follows: Circle choices and remit amount shown for each.

AAC	02	\$10	_____
AM	03	\$10	_____
IJSB	04	\$8	_____
JVI	05	\$10	_____
BR	07	\$4	_____
IAI	09	\$10	_____

3. Total and Remit (You must remit at least \$20) _____
