

IBF INDUBIOSE
The
"ONE-TWO PUNCH"

AGAROSE

A37

25 gm \$35.00
100 gm 70.00

For electrophoresis and immunology applications with a gelling temperature at 37°C.

A45

25 gr \$35.00
100 gr 70.00

For use in bacteriology and virology work. The gelling temperature is 45°C.

The world's two most widely used clinical laboratory manuals are now available in completely revised and updated new editions:

Manual of Clinical Microbiology, 3RD EDITION

Manual of Clinical Immunology, 2ND EDITION

Manual of Clinical Microbiology, 3rd Edition

Editors: Edwin H. Lennette, Albert Balows, William J. Hausler, Jr., Joseph P. Truant
July 1980, 1,047 pages, fully illustrated, available in two bindings:
Clothbound (ISBN: 0-914826-24-7), \$25.00; (ASM Members: \$18.00)
Flexible binding (ISBN: 0-914826-26-3), \$21.00; (ASM Members: \$15.00)

Manual of Clinical Immunology, 2nd Edition

Editors: Noel R. Rose and Herman Friedman
July 1980, 1,105 pages, fully illustrated, available in two bindings:
Clothbound (ISBN: 0-914826-25-5), \$25.00; (ASM Members: \$18.00)
Flexible binding (ISBN: 0-914826-27-1), \$21.00; (ASM Members: \$15.00)

Please note that members of the Society must remit payment with order, and that books sold to ASM members are for personal use only. Orders from overseas must be prepaid.

Napco[®] announces: the years-ahead incubator system that won't be matched.

The new Napco water jacketed 6000 series embodies more important benefits and features than any incubator ever marketed.

Here are some of over 15 advances in incubator design.

1. More accurate control of chamber temperature.

By positioning sensors not only in the water jacket, *but also in the chamber itself*, Napco permits more precise chamber monitoring than other water jacketed incubators.

2. New electronic controls, digital display.

New solid state control system reduces chamber variances, and scanning digital displays monitor chamber parameters.

3. The first modular design.

All control elements can be unplugged from the chamber module for quick service.

4. Unique wet-jet air flow system.

The exclusive wet-jet air flow system provides maximum chamber uniformity and assures

the highest relative humidity available in any incubator.

5. More secure chamber uniformity.

Superior new Napco door closure systems ensure integrity of inner chamber.

6. The only water jacketed CO₂ incubator you can get really clean.

Shelf standards and plenums can be easily removed for cleaning in five minutes.

This leaves an empty, perfectly smooth chamber that can be swabbed for easy management of spores and contaminating organisms.

7. The best service in the industry.

If you should ever have an equipment breakdown, a *Heinicke-Napco Minute Man will be on his way to you in 48 hours.* You'll seldom need the Minute Man service because Heinicke and Napco instruments are built to work. But if you do, dial toll free 800-327-9783.

Introducing a new constant flow incubator~ the 4000 series.

The new modular Napco constant flow system embodies a unique principle that offers superior results in tissue culture and related disciplines. Each of the modular chambers has its own individual controls and separate metering system, to accommodate specific environments in each module.
