Napco[®] announces: the years-ahead incubator system that won't be matched.

The new Napco water jacketed 6000 series embodies more important benefits and features than any incubator ever marketed.

Here are some of over 15 advances in incubator design.

1. More accurate control of chamber temperature.

By positioning sensors not only in the water jacket, *but also in the chamber itself*, Napco permits more precise chamber monitoring than other water jacketed incubators.

2. New electronic controls, digital display.

New solid state control system reduces chamber variances, and scanning digital displays monitor chamber parameters.

3. The first modular design.

All control elements can be unplugged from the chamber module for quick service.

4. Unique wet-jet air flow system.

The exclusive wet-jet air flow system provides maximum chamber uniformity and assures

the highest relative humidity available in any incubator.

5. More secure chamber uniformity.

Superior new Napco door closure systems ensure integrity of inner chamber.

6. The only water jacketed CO₂ incubator you can get really clean.

Shelf standards and plenums can be easily removed for cleaning in five minutes. This leaves an empty, perfectly smooth chamber that can be swabbed for easy management of spores and contaminating organisms.

7. The best service in the industry.

If you should ever have an equipment breakdown, a *Heinicke-Napco Minute Man will be on his way to you in 48 hours.* You'll seldom need the Minute Man service because Heinicke and Napco instruments are built to work. But if you do, dial toll free 800-327-9783.

Introducing a new constant flow incubator~ the 4000 series.

The new modular Napco constant flow system embodies a unique principle that offers superior results in tissue culture and related disciplines. Each of the modular chambers has its own individual controls and separate metering system, to accommodate specific environments in each module.

Curtin-Matheson, Fisher Scientific Co.,
Preiser, Sargent-Welch, S.G.A. Scientific,
Scientific Products, Arthur H. Thomas Co.,
In Canada: Canlab, Fisher Scientific
Co. Ltd., Sargent-Welch of Canada Ltd.

All Napco water-jacket incubators are available in three space saving models.

On the interface of basic and applied science

MICROBIOLOGY 1981

Editor: David Schlessinger

April 1981, 424 pages, clothbound. \$15.00 to members of ASM.
\$25.00 to others. ISBN: 0-914826-31-X

100 extended abstracts of recent conference and symposia reports bring to the scientist some of the most exciting new work in the following major areas:

REGULATORY MECHANISMS

- Regulatory Signals
- RNA Replication

GENE MOVEMENTS AND LABORATORY EVOLUTION

- Phage and Viral Site-Specific Recombination
- Molecular Genetics of Nitrogen Fixation
- Transposons as Tools in Microbial Genetics
- Molecular Evolution

INFECTIOUS DISEASES

- Newly Recognized Infectious Agents
- The Polymorphonuclear Leukocyte in Host Defense
- Candidiasis: an Infectious Disease of Increasing Importance
- Organization of Fungal Cell Surface

DIAGNOSTIC IMMUNOLOGY

GENETICS AND MOLECULAR BIOLOGY OF INDUSTRIAL MICROORGANISMS

In the words of David Schlessinger,

“New techniques make possible more powerful experiments and more powerful diagnostic techniques... science, no less than politics is the art of the possible.”

That art is amply illustrated in this new compendium of important recent research.

VIRAL HEPATITIS: 1981 INTERNATIONAL SYMPOSIUM

Wolf Szmuness, The Lindsley F. Kimball
Research Institute of The New York Blood Center,
Harvey J. Alter, National Institutes of Health, and
James E. Maynard, Centers for Disease Control, Editors

The proceedings of the 1981 International Symposium on
Viral Hepatitis offer an in-depth and clinical summation of the
etiology, pathology, immunology, epidemiology, diagnosis,
and treatment of all three forms of viral hepatitis.
ISBN: 0-89168-040-3, February 1982, ca 800 pp.
Hardbound \$69.50

THE HAZARD FROM DANGEROUS EXOTIC DISEASES

John C. N. Westwood, M.D.,
University of Ottawa School of Medicine

Analyzes the hazard of lethal, highly infectious diseases.
Examines in detail three recently discovered diseases—Lassa,
Marburg and Ebola Fever—as well as the Plague, Smallpox
and Yellow Fever. Discusses both the current and future
dangers they represent, and includes a consideration of
control and containment.

ISBN: 0-333-283600, 1980, 223 pp.
Clothbound with dustjacket \$40.00

the state of the art of clinical microbiology—*

RAPID METHODS and AUTOMATION in Microbiology

EDITOR: Richard C. Tilton

This new collection of research papers on a topic of increasing and critical interest promises to be of real assistance to clinical microbiologists, clinical pathologists, immunologists, medical technologists, and others who are caught up in the rapidly changing environment of microbiology. The speed of publication lends added utility to this survey of technologically advanced—and advancing—methods and procedures. The book, indeed, captures some of the excitement that was in the air at the meeting in May 1981 on which this volume is based: the Third International Symposium on Rapid Methods and Automation in Microbiology.

As the keynote seminar of the symposium suggested, topics of particular concern include systems approaches, evaluation, and the future of diagnostic systems in microbiology. The book fully develops the following areas:

- Computer Systems in Clinical Microbiology
- Rapid Detection of Microorganisms in Body Fluids
- Hydrophobic Grid-Membrane Microbiology
- Rapid Reporting in Microbiology
- Immunological Diagnosis of Infectious Diseases
- Chromatographic Analysis: A New Future for Clinical Microbiology
- Rapid Detection of Microorganisms in Urine
- Rapid Methods in Food Microbiology
- Systems Approaches to Diagnostic Microbiology
- Rapid Identification of Viral, Chlamydial, and Mycoplasmal Agents
- Rapid Identification of Clinically Important Anaerobes
- Applications of the Autobac System
- Clinical and Research Applications of the MS-2 System
- Nonautomated Rapid Methods in Microbiology

ORDERING INFORMATION:

Early 1982. About 300 pages. Clothbound. \$30.00. ISBN: 0-914826-38-7
