

JOURNAL OF VIROLOGY

Volume 62

January 1988

No. 1

ANIMAL VIRUSES

- Identification and Gene Mapping of a 14,700-Molecular-Weight Protein Encoded by Region E3 of Group C Adenoviruses.** Ann E. Tollefson and William S. M. Wold 33-39
- Detection of Phosphorylated Forms of Moloney Murine Leukemia Virus Major Capsid Protein p30 by Immunoprecipitation and Two-Dimensional Gel Electrophoresis.** Kazuyoshi Ikuta and Ronald B. Luftig 40-46
- Effects of 5'-Terminal Modifications on the Biological Activity of Defective Interfering RNAs of Sindbis Virus.** Manuel Tsiang, Barbara G. Weiss, and Sondra Schlesinger 47-53
- Organization of the Transcriptional Control Region of the E1b Gene of Adenovirus Type 5.** Christopher L. Parks, Subhasis Banerjee, and David J. Spector 54-67
- Localization of Sequences Responsible for *trans*-Activation of the Equine Infectious Anemia Virus Long Terminal Repeat.** Levana Sherman, Arnona Gazit, Abraham Yaniv, Toshiaki Kawakami, John E. Dahlberg, and Steven R. Tronick 120-126
- Regulation of Glycoprotein D Synthesis: Does $\alpha 4$, the Major Regulatory Protein of Herpes Simplex Virus 1, Regulate Late Genes Both Positively and Negatively?** Minas Arsenakis, Gabriella Campadelli-Fiume, and Bernard Roizman 148-158
- Entry of Herpes Simplex Virus 1 in BJ Cells That Constitutively Express Viral Glycoprotein D Is by Endocytosis and Results in Degradation of the Virus.** G. Campadelli-Fiume, M. Arsenakis, F. Farabegoli, and B. Roizman 159-167
- Polymorphism of Murine Endogenous Proviruses Revealed by Using Virus Class-Specific Oligonucleotide Probes.** Jonathan P. Stoye and John M. Coffin ... 168-175
- Herpes Simplex Virus Type 1-Induced Ribonucleotide Reductase Activity Is Dispensable for Virus Growth and DNA Synthesis: Isolation and Characterization of an ICP6 *lacZ* Insertion Mutant.** David J. Goldstein and Sandra K. Weller 196-205
- Adenovirus E1B 55-M_r Polypeptide Facilitates Timely Cytoplasmic Accumulation of Adeno-Associated Virus mRNAs.** Richard Jude Samulski and Thomas Shenk 206-210
- Molecular Cloning and Characterization of Cytoplasmic Polyhedrosis Virus Polyhedrin and a Viable Deletion Mutant Gene.** Max Arella, Claude Lavallée, Serge Belloncik, and Yasuhiro Furuichi 211-217
- Cloning and Characterization of a Papillomavirus Associated with Papillomas and Carcinomas in the European Harvest Mouse (*Micromys minutus*).** M. Kerry O'Banion, M. E. Reichmann, and John P. Sundberg 226-233
- Nucleotide Sequence and Genome Organization of Canine Parvovirus.** A. Paul Reed, Elaine V. Jones, and Timothy J. Miller 266-276

Continued on following page

Vesicular Stomatitis Virus in <i>Drosophila melanogaster</i> Cells: Regulation of Viral Transcription and Replication. Danielle Blondel, Anne-Marie Petitjean, Sybille Dezélee, and Françoise Wyers	277–284
Molecular Dissection of <i>cis</i>-Acting Regulatory Elements from 5'-Proximal Regions of a Vaccinia Virus Late Gene Cluster. Jeffrey N. Miner, Scott L. Weinrich, and Dennis E. Hruby	297–304
Four Phosphoproteins with Common Amino Termini Are Encoded by Human Cytomegalovirus AD169. Dowain A. Wright, Silvija I. Staprans, and Deborah H. Spector	331–340
Suppression of RNA Synthesis by a Specific Antiviral Activity in Sindbis Virus-Infected <i>Aedes albopictus</i> Cells. Lynn D. Condreay and Dennis T. Brown	346–348
Quantitative Basic Residue Requirements in the Cleavage-Activation Site of the Fusion Glycoprotein as a Determinant of Virulence for Newcastle Disease Virus. Rhona L. Glickman, Richard J. Syddall, Ronald M. Iorio, John P. Sheehan, and Michael A. Bratt.....	354–356

VIRUS-CELL INTERACTIONS

Host Cell-Specific Growth Advantage of Pseudorabies Virus with a Deletion in the Genome Sequences Encoding a Structural Glycoprotein. Thomas C. Mettenleiter, Bela Lomniczi, Nancy Sugg, Christa Schreurs, and Tamar Ben-Porat	12–19
La Crosse Virus Infection of Mammalian Cells Induces mRNA Instability. Ramaswamy Raju and Daniel Kolakofsky	27–32
Regulation of Adeno-Associated Virus Gene Expression in 293 Cells: Control of mRNA Abundance and Translation. James P. Trempe and Barrie J. Carter	68–74
The Avian Retrovirus <i>env</i> Gene Family: Molecular Analysis of Host Range and Antigenic Variants. Carol A. Bova, John C. Olsen, and Ronald Swanson.....	75–83
Isolation and Characterization of Herpes Simplex Virus Type 1 Host Range Mutants Defective in Viral DNA Synthesis. Ellen P. Carmichael, Marshall J. Kosovsky, and Sandra K. Weller	91–99
Temperature-Sensitive Cellular Mutant for Expression of mRNA from Murine Retrovirus. Hirokazu Inoue, Shinae Kizaka, Masuo Yutsudo, and Akira Hakura	106–113
Transcription of Interferon-Stimulated Genes Is Induced by Adenovirus Particles but Is Suppressed by E1A Gene Products. Nancy Reich, Richard Pine, David Levy, and James E. Darnell, Jr.....	114–119
A Human Cytomegalovirus Function Inhibits Replication of Herpes Simplex Virus. Karen D. Cockley, Kimiyasu Shiraki, and Fred Rapp	188–195
Alterations in Binding Characteristics of the Human Immunodeficiency Virus Enhancer Factor. Foon Wu, Joseph Garcia, Ronald Mitsuyasu, and Richard Gaynor	218–225
Two Regions of the Adenovirus Early Region 1A Proteins Are Required for Transformation. Peter Whyte, H. Earl Ruley, and Ed Harlow	257–265
Progression of the Phenotype of Transformed Cells after Growth Stimulation of Cells by a Human Papillomavirus Type 16 Gene Function. Tetsuo Noda, Hajime Yajima, and Yoshiaki Ito	313–324
Avian Sarcoma-Leukosis Virus <i>pol</i>-endo Proteins Expressed Independently in Mammalian Cells Accumulate in the Nucleus but Can Be Directed to Other Cellular Compartments. Claire Morris-Vasios, Jarema P. Kochan, and Anna Marie Skalka	349–353

Identification of Point Mutations in the Envelope Gene of Moloney Murine Leukemia Virus TB Temperature-Sensitive Paralytogenic Mutant *ts1*: Molecular Determinants for Neurovirulence. Paul F. Szurek, P. H. Yuen, Rita Jerzy, and P. K. Y. Wong 357–360

BACTERIAL VIRUSES

Production of a Polyhedral Particle in *Escherichia coli* from a cDNA Copy of the Large Genomic Segment of Bacteriophage $\phi 6$. Paul Gottlieb, Jeffrey Strassman, Dennis H. Bamford, and Leonard Mindich 181–187

Induction of the Heat Shock Regulon of *Escherichia coli* Markedly Increases Production of Bacterial Viruses at High Temperatures. John S. Wiberg, Mary Flowers Mowrey-McKee, and Eric J. Stevens 234–245

VIRAL PATHOGENESIS AND IMMUNITY

Antigenic Site II of the Rabies Virus Glycoprotein: Structure and Role in Viral Virulence. Christophe Prehaud, Patrice Coulon, Florence LaFay, Chantal Thiers, and Anne Flamand 1–7

Induction of Alpha Interferon by Transmissible Gastroenteritis Coronavirus: Role of Transmembrane Glycoprotein E1. Bernard Charley and Hubert Laude 8–11

Antibody-Mediated Growth of Influenza A NWS Virus in Macrophagelike Cell Line P388D1. Hiroshi Ochiai, Masahiko Kurokawa, Kyoko Hayashi, and Seihachiro Niwayama 20–26

Accumulation of RNA Homologous to Human Papillomavirus Type 16 Open Reading Frames in Genital Precancers. Christopher P. Crum, Gerard Nuovo, Daniel Friedman, and Saul J. Silverstein 84–90

Sequence Homology and Immunologic Cross-Reactivity of Human Cytomegalovirus with HLA-DR β Chain: a Means for Graft Rejection and Immunosuppression. Robert S. Fujinami, Jay A. Nelson, Leslie Walker, and Michael B. A. Oldstone 100–105

Rotavirus-Specific Cytotoxic T Lymphocytes Cross-React with Target Cells Infected with Different Rotavirus Serotypes. Paul A. Offit and Karla I. Dudzik 127–131

Molecular Comparisons of In Vivo- and In Vitro-Derived Strains of Aleutian Disease of Mink Parvovirus. Marshall E. Bloom, Oskar-Ruger Kaaden, Eric Huggans, Anders Cohn, and James B. Wolfenbarger 132–138

In Vitro Mutagenesis Identifies a Region within the Envelope Gene of the Human Immunodeficiency Virus That Is Critical for Infectivity. Ronald L. Willey, Douglas H. Smith, Laurence A. Lasky, Theodore S. Theodore, Patricia L. Earl, Bernard Moss, Daniel J. Capon, and Malcolm A. Martin 139–147

Characterization of a Recombinant Vaccinia Virus Expressing Human Melanoma-Associated Antigen p97. Shiu-Lok Hu, Gregory D. Plowman, Pennathur Sridhar, Ulrike S. Stevenson, Joseph P. Brown, and Charles D. Estin 176–180

Sigma 1 Protein of Mammalian Reoviruses Extends from the Surfaces of Viral Particles. Deirdre B. Furlong, Max L. Nibert, and Bernard N. Fields 246–256

Fine Mapping Two Distinct Antigenic Sites on Simian Virus 40 (SV40) T Antigen Reactive with SV40-Specific Cytotoxic T-Cell Clones by Using SV40 Deletion Mutants. Robert W. Anderson, Mary J. Tevethia, Daniel Calderon, Alan E. Smith, and Satvir S. Tevethia 285–296

Continued from preceding page

Distinct Epitopes Recognized by <i>I-A^d</i>-Restricted T-Cell Clones within Antigenic Site E on Influenza Virus Hemagglutinin. Lorena E. Brown, Rosemary A. Ffrench, Jacinta M. Gawler, David C. Jackson, Michael L. Dyall-Smith, E. Margot Anders, Geoffrey W. Tregear, Lucy Duncan, P. Anne Underwood, and David O. White	305-312
Activation of the Human Beta Interferon Gene by the Adenovirus Type 12 E1B Gene. Kazuko Shiroki and Miklos Toth	325-330
Nonpermissivity of Human Peripheral Blood Lymphocytes to Adenovirus Type 2 Infection. Joseph Horvath and Joseph M. Weber	341-345
A Retrovirus Carrying the Polyomavirus Middle T Gene Induces Acute Thrombocytopenic Myeloproliferative Disease in Mice. Alfredo Fusco, Giuseppe Portella, Michele Grieco, Gianfranco Tajana, Giovanni Di Minno, Nicoletta Polli, and Antonio Pinto	361-365

Date of Issue: 11 December 1987

NOTICE

Journal of Virology page charges have been reduced from \$55 to \$35 per page. While we continue to depend upon page charges to cover a portion of the costs of producing the journal, other economies have allowed us to reduce the extent of our reliance upon page charges to help support the ASM journals program.
