The *Journal of Virology* (ISSN 0022-538X), a publication of the American Society for Microbiology, 1325 Massachusetts Ave., N.W., Washington, DC 20005-4171, is devoted to the dissemination of fundamental knowledge concerning viruses of bacteria, plants, and animals. Investigators are invited to submit reports of original research in all areas of basic virology, including biochemistry, biophysics, genetics, immunology, morphology, physiology, and pathogenesis and immunity. Instructions to authors are published in the January issue each year; reprints are available from the editors and the Journals Division. The *Journal* is issued monthly, one volume per year. The nonmember subscription prices are \$350 (U.S. and Canada) and \$400 (foreign; air drop shipping) per year; single copies are \$40. The member subscription prices are \$41 (U.S. and Canada) and \$91 (foreign; air drop shipping) per year; single copies are \$10. Correspondence relating to subscriptions, reprints, defective copies, availability of back issues, lost or late proofs, disposition of submitted manuscripts, and general editorial matters should be directed to the ASM Journals Division, 1325 Massachusetts Ave., N.W., Washington, DC 20005-4171 (phone: 202 737-3600).

Claims for missing issues from residents of the United States, Canada, and Mexico must be submitted within 3 months after publication of the issues; residents of all other countries must submit claims within 6 months of publication of the issues. Claims for issues missing because of failure to report an address change or for issues "missing from files" will not be allowed.

Second-class postage paid at Washington, DC 20005, and at additional mailing offices.

POSTMASTER: Send address changes to *Journal of Virology*, ASM, 1325 Massachusetts Ave., N.W., Washington, DC 20005-4171.

Made in the U.S.A. Printed on acid-free paper.

ESCHERICHIA COLI LINKAGE MAP

Call for reprints

The 1990 *Escherichia coli* linkage map, edition 8 (Microbiol. Rev. 54:130-197, 1990), was 2 years out of date at the time of publication. One of the major problems in revising the map is that of obtaining copies of all the papers containing mapping data. While edition 8 was being prepared, the Yale University science libraries cancelled their subscriptions to many journals, and they cannot afford to subscribe to many new ones. It would be immensely helpful if authors of papers containing mapping data of any sort would send to me reprints of their papers from all journals other than the *Journal of Bacteriology*. This might permit publication of map revisions in a more timely fashion.

Barbara J. Bachmann
Department of Biology
OML 355
Yale University
P.O. Box 6666
New Haven, CT 06511-7444

E. COLI WALL MAP AVAILABLE

A limited supply of the following will be available from ASM: reprints of the article "Linkage Map of *Escherichia coli* K-12, Edition 8," by Barbara J. Bachmann (Microbiol. Rev. 54:130-197, 1990) and wall charts (ca. 21 × 24½") of the *E. coli* linkage map. Shipped together in a mailing tube. \$10.50, U.S. and Canada; \$12.50, foreign (surface).

Prices are subject to change without notice. All orders must be accompanied by payment in U.S. dollars, drawn on a U.S. bank located within the continental United States, or charged to MasterCard, VISA, or American Express. ASM does not accept wire transfers. Charge card orders may be placed by telephone (202-737-3600) or by fax (202-737-0368). Mail orders should be addressed to: American Society for Microbiology, Publication Sales, 1325 Massachusetts Ave., N.W., Washington, DC 20005-4171.

PHYSICAL AND GENETIC MAP OF ESCHERICHIA COLI

Call for Contributions

The *Journal of Bacteriology* will publish in brief text or tabular form and on a quarterly basis the physical locations of genes and loci assigned to the *Escherichia coli* chromosome. This information can be presented by the unambiguous identification of a matching restriction pattern or by the assignment of a gene or locus to a particular λ phage from the "Miniset" library. Manuscript should be submitted in duplicate to the ASM Publications Department. All parts must be typed double spaced. Galley proofs will not be sent to the authors, and no page charge(s) will be assessed for these contributions. Reprints will not be available. For a more complete description of these submissions, see the January 1990 issue of *ASM News*, p. 6-7.

CALCIUM AS AN INTRACELLULAR MESSENGER IN EUCARYOTIC MICROBES

Edited by **Danton H. O'Day**, *Erindale College,
University of Toronto, Mississauga, Ontario, Canada*

This unique work is the first to review current research on the role of calcium in the cellular functions of lower-eucaryotes. The ways calcium levels are regulated, how calcium can serve as an intracellular signal, and the roles of calcium in many cellular functions are closely examined.

Hardcover (ISBN 1-55581-023-3), June 1990. 430 pages, illustrated, index. Member: \$54.00; Nonmember: \$72.00. When ordering, specify offer number JVI 9/90-023-3.
