The *Journal of Virology*, a publication of the American Society for Microbiology (ASM), 1325 Massachusetts Ave., N.W., Washington, DC 20005-4171, is devoted to the dissemination of fundamental knowledge concerning viruses of bacteria, plants, and animals. Investigators are invited to submit reports of original research in all areas of basic virology, including biochemistry, biophysics, genetics, immunology, morphology, physiology, and pathogenesis and immunity. Instructions to authors are published in the January issue each year; reprints are available from the editors and the Journals Division. The *Journal* is issued monthly, one volume per year. The nonmember print subscription prices are \$362 (U.S.) (Canadians add 7% GST) and \$432 (other countries) per year; single copies are \$40 (Canadians add 7% GST). The member print subscription prices are \$81 (U.S.) (Canadians add 7% GST) and \$106 (other countries); single copies are \$10 (Canadians add 7% GST). For prices of CD-ROM versions, contact the Subscriptions Unit, ASM. Correspondence relating to subscriptions, defective copies, missing issues, and availability of back issues should be directed to the Subscriptions Unit, ASM; correspondence relating to reprint orders should be directed to the Reprint Order Unit, ASM; and correspondence relating to disposition of submitted manuscripts, proofs, and general editorial matters should be directed to the Journals Division, American Society for Microbiology, 1325 Massachusetts Ave., N.W., Washington, DC 20005-4171. Phone: (202) 737-3600.

Claims for missing issues from residents of the United States, Canada, and Mexico must be submitted within 3 months after publication of the issues; residents of all other countries must submit claims within 6 months of publication of the issues. Claims for issues missing because of failure to report an address change or for issues "missing from files" will not be allowed.

Second-class postage paid at Washington, DC 20005, and at additional mailing offices.

POSTMASTER: Send address changes to *Journal of Virology*, ASM, 1325 Massachusetts Ave., N.W., Washington, DC 20005-4171.

Made in the U.S.A. Printed on acid-free paper.

From eucaryotes to viruses... depend on these two ASM journals for cutting-edge science

Molecular and Cellular Biology

Editor in Chief: Alan M. Weiner

Researchers find MCB to be an authoritative source of fundamental knowledge and new developments in all aspects of the molecular biology of eucaryotic cells, of both microbial and higher organisms. The scope includes regulation of gene expression, transcription, cell growth and development, oncogenesis, cell and organelle structure and assembly, DNA replication and recombination, chromosome structure, and somatic cell genetics. The journal publishes work on microbial as well as higher organisms and on viral systems where the emphasis is clearly on the cell.

ISSN 0270-7306 • 6,000 pages/year • monthly • \$361.00 (U.S.A.) (Canadians add 7% GST) • \$462.00 (other countries). Members of ASM may subscribe at \$80.00 (U.S.A.) (Canadians add 7% GST), \$105.00 (other countries).

Journal of Virology

Editor in Chief: Arnold J. Levine

While many competing journals publish in narrowly specialized areas, JVI provides fundamental new information using cross-disciplinary approaches of biochemistry, biophysics, cell biology, genetics, immunology, molecular biology, morphology, physiology, and pathogenesis and immunity. More than a simple reporting of new data, the journal includes articles containing experimental observations which lead to innovative concepts and stimulate new directions for research. Specific sections include: Viral and Cellular Oncogenes, Viral Pathogenesis and Immunity, Virus-Cell Interactions, Animal Viruses, Bacterial Viruses, Plant Viruses, and Protozoan and Fungal Viruses. Also included are minireviews.

ISSN 0022-538X • 8,100 pages/year • monthly • \$362.00 (U.S.A.) (Canadians add 7% GST) • \$432.00 (other countries). Members of ASM may subscribe at \$81.00 (U.S.A.) (Canadians add 7% GST), \$106.00 (other countries).

Both journals are now also available on compact disc (CD-ROM) for both Macintosh and MS-DOS personal computers. For information and prices for monthly subscriptions or yearly archival discs, fax (202 737-0367) or write to the Subscriptions Unit at the address given below.

Discover the Latest in Virology.

The Viruses

Series Editors: Heinz Fraenkel-Conrat
and Robert R. Wagner

THE RETROVIRIDAE

Volume 1

edited by Jay A. Levy

This volume offers definitive studies of the biology, pathology, immunology, and molecular features of retroviruses. Contributors detail

- theories of the origin of retroviruses
- evolutionary potential of complex retroviruses
- studies of avian and murine retroviruses
- the presence of retrovirus-like elements in microorganisms
- involvement of retroviruses in normal development processes.

0-306-44074-1/504 pp./ill./1992/\$95.00

Volume 2

edited by Jay A. Levy

Volume 2 presents up-to-date research on the biological and molecular aspects of viruses found in a broad range of animal species, including the feline oncoretroviruses, feline immunodeficiency virus, lentiviruses in sheep and goats, equine retroviruses, spumaviruses, and human retroviruses.

0-306-44369-4/458 pp./ill./1993/\$89.50

THE ARENAVIRIDAE

edited by Maria S. Salvato

International experts detail the latest molecular, organismal, and epidemiological research on arenaviruses. Chapters highlight new

- arenaviruses
- host populations
- vaccine trials and strategies
- insights into arenavirus transcription
- sequence information
- observations on human infection.

Speculative models and diagrams, reflections on future research directions, and illuminating electron micrographs make this volume an indispensable reference.

THE PARAMYXOVIRUSES

edited by David W. Kingsbury

"Represents a unique and successful effort to summarize our knowledge of paramyxoviruses."

—ASM News

In *The Paramyxoviruses*, internationally recognized authorities provide a comprehensive survey of basic research on all aspects of the paramyxovirus family, including taxonomy, evolution, genetics, molecular biology, interactions with host cells, acute and chronic infections, epidemiology, immune defenses, and prospects for development of new vaccines.
