COVER IMAGE

Cover photograph: Consumption of excess nutrients does more than increase your waistline—it enhances influenza disease severity. Like obese humans, obese mice are highly susceptible to influenza and viral pathogenesis is enhanced. The loss of an epithelial integrin, $\beta 6$, increased survival of obese mice, reducing acute lung injury and decreasing viral spread. Artwork by Rebekah Honce, St. Jude Children’s Research Hospital. (See related article at e01646-18.) (Copyright © 2019 American Society for Microbiology. All Rights Reserved.)
